 Betreft: Effect measurement after programming ALMG5 sticker

On September 4, Vortex Vitalis programmed 1014 ALMG5 stickers at the request of Aad van der Starre. This programming provides protection against electromagnetic load in the broadest sense of the word (EMFP-ElectroMagnetic-Field Pollution. In addition, this programming provides for the energetic purification of water if it is in a storage vessel.

The effect of this programming has been tested in three ways:

- By means of Bovis measurements on a mobile phone
- By means of Bovis measurements of a person
- By means of vitality measurements of water for 24 hours in a stainless steel thermos flask with a sticker attached.

The cellphone

My wife's smartphone naturally has a Bovis value of -45,000.

With a programmed ALMG5 sticker stuck on the back of the mobile, the Bovis value of the mobile appears to have become +51,000. From strongly negative to strongly positive.

If my wife holds the cell phone with sticker against her third chakra, her total Bovis value does not increase by 51,000 but by 74,000 Bovis.

A person

If my wife (with a very high Bovis value) only holds the sticker in her hand and holds this hand against her third chakra, her Bovis value increases by 20%.

A 0.5 liter stainless steel thermos

This jug is filled with tap water. The sticker with the Vitruvian man taken away from the can is stuck under the heel of the jug. Effect measurements on the drinking water were carried out after 0.5 hours, 1 hour, 2 hours, 4 hours, 8 hours and 24 hours. See Table 1 and Figure 1 on the next page.

The $t = 0$ situation is the energetic water quality at the time of drawing from the kitchen tap. Then the water is poured into the stainless steel jug. And then measurements are taken periodically at the indicated times.

What we see is that the positivity of the Bovis value increases from 9.17 to 10, the intention of the makers increases from 9.30 to 10 and the germination rate increases from 9.47 to 10. These were already healthy high values, but they increase in 24 hours to the maximum value of 10.

The Bovis value increases from 19,600 to 55,000 Bovis. The Negative Information falls from 2.14 to 0.45.

The Electromagnetic Load falls from 2.03 to 0.53.

The measured values in tabular form:

	Parameter	t = 0	30 min	1 uur	2 uur	4 uur	8 uur	24 uur
1	Bovisvalue	19.600	28.300	33.300	40.600	49.900	53.500	55.000
2	Positivity of this Bovis value	9,17	9,50	9,70	9,96	10	10	10
3	The intention of the makers	9,30	9,93	9,93	9,93	9,95	9,97	10
4	Germination	9,47	9,93	9,96	9,99	10	10	10
5	Negative informatio	2,14	1,53	1,13	0,89	0,63	0,56	0,45
6	Elektromagnetic load	2,03	1,25	0,99	0,82	0,64	0,58	0,53

Tabel 1: Development of water vitality in stainless steel jug for 24 hours with programmed ALMG5 sticker on the heel

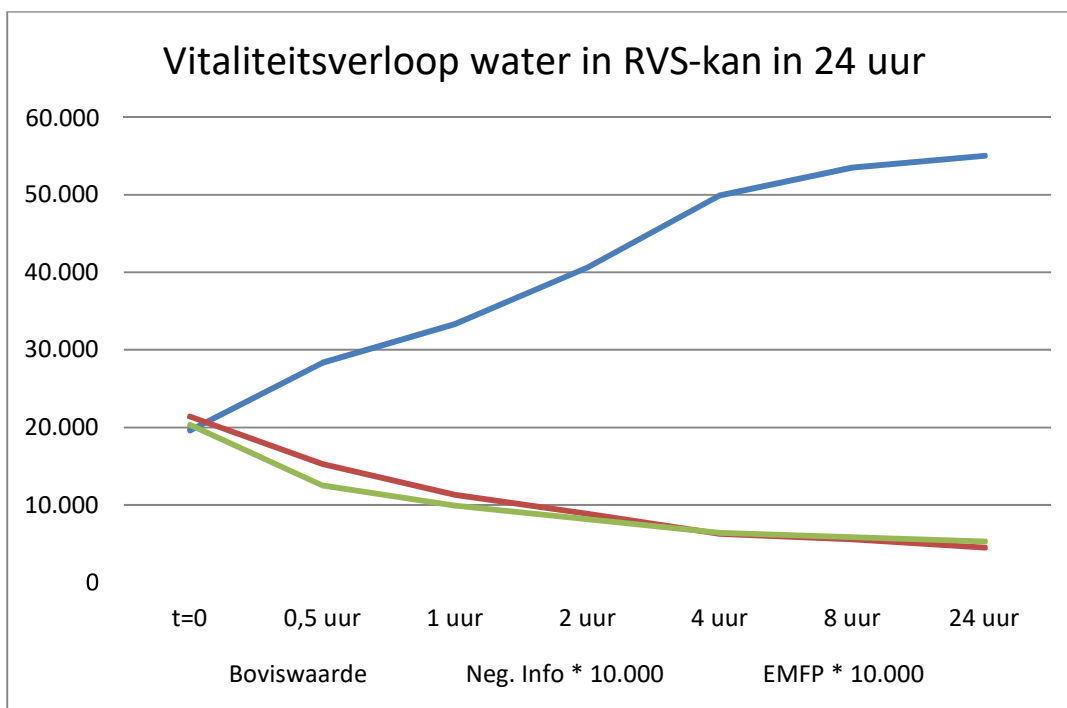

Figure 1: Vitality course of water in stainless steel jug with ALMG5 sticker on the heel

Conclusion: the ALMG5 sticker has a very positive effect on both the mobile phone and the water in the stainless steel thermos.

The biophysical content of the water is significantly improved (all parameters amply meet the requirements for energetically healthy water) and the mobile phone no longer weakens the human body.
